Question Booklet
Alpha Code

B

Question Booklet No.

200086

Signature :

Reg. No. :

Total No. of questions : 200

Time : 2½ Hours

Maximum : 100 Marks

INSTRUCTIONS TO CANDIDATE

1. The question paper will be given in the form of a Question Booklet. There will be four versions of Question Booklet Alpha Code such as A, B, C and D.
2. The alpha code will be printed on the top left margin of the facing sheet of the Question Booklet.
3. If you get a Question Booklet where the alpha code does not match your Register Number, please draw the attention of the Invigilator IMMEDIATELY.
4. The Question Booklet will be sealed at the middle of the right margin. Candidate **should not** open the Question Booklet, until the indication is given to start answering.
5. Immediately after the commencement of the examination, the candidates should check that the Question Booklet supplied to him/her contains all the 200 questions in serial order. The Question Booklet does not have unprinted or torn or missing pages and if so, he/she should bring it to the notice of the Invigilator and get it replaced by a complete booklet with same alpha code. This is **most important**.
6. **Do not write or mark anything** on your Question Booklet. A separate paper will be provided for rough work.
7. Please read carefully all the instructions on the Answer Sheet (Part B – Side B) before marking your answers.
8. Each question is provided with four alternative choices (A), (B), (C) and (D). Choose the correct alternative and darken the bubble corresponding to the question number using Blue or Black Ball-Point Pen in the OMR Answer Sheet.
9. Each correct answer carries 1/2 mark.
10. A candidate will not be allowed to leave the examination hall till the end of the session and without handing over his/her Answer Sheet to the Invigilator. The candidate should ensure that the Invigilator has verified all the entries in the Register Number Coding Sheet and has affixed the Invigilator's signature in the appropriate space provided.
11. Strict compliance of instruction is essential. Any malpractice or attempt to commit any kind of malpractice in the examination will result in the summary disqualification of the candidate.

 - B) Object-oriented programming
 - C) High-level abstraction
 - D) Assembly programming
172. Which SQL clause is used to filter the results of a query?
- A) SELECT
 - B) FILTER
 - C) WHERE
 - D) LIMIT
173. What is normalization in the context of database design?
- A) Simplifying complex queries
 - B) Organizing data to reduce redundancy
 - C) Creating backup copies of the database
 - D) Connecting two databases together
174. What is the purpose of the GROUP BY clause in SQL?
- A) To filter results based on a condition
 - B) To sort the results in ascending order
 - C) To group rows that have the same values in specified columns
 - D) To join multiple tables
175. Which web server is known for its open-source nature and widely used for hosting websites?
- A) Nginx
 - B) IIS (Internet Information Services)
 - C) Apache
 - D) Tomcat
176. Which of the following is a physical layer device in a network?
- A) Hub
 - B) Switch
 - C) Router
 - D) Repeater
177. What is the purpose of a firewall in network security?
- A) Filter and control network traffic based on a set of rules
 - B) Connect devices within the same LAN
 - C) Route data between different networks
 - D) Provide encryption for data transmission
178. In the context of networking, what does the term "protocol" refer to?
- A) A set of rules for communication between devices
 - B) A physical device that connects computers in a LAN
 - C) The speed of data transmission in a network
 - D) A type of computer virus
179. What is the function of an Ethernet switch in a local area network (LAN)?
- A) Connects different networks
 - B) Broadcasts data to all devices in the network
 - C) Filters and forwards data based on MAC addresses
 - D) Routes data between devices within the same LAN

180. What is the purpose of the Domain Name System (DNS) in a network?
- A) To control network access
 - B) To encrypt data transmission
 - C) To translate domain names into IP addresses
 - D) To route data between different networks
181. Which of the following is not a part of the system design phase?
- A) Logical design
 - B) Physical design
 - C) Feasibility analysis
 - D) Requirement analysis
182. What is the purpose of a data model in software development?
- A) To represent the flow of control in a program
 - B) To depict the structure and relationships within a database
 - C) To define the user interface
 - D) To conduct system testing
183. What does the term "scalability" refer to in the context of system architecture?
- A) The ability of the system to handle increased workload
 - B) The size of the development team
 - C) The speed of the system
 - D) The cost of the system
184. What is the primary purpose of a data warehouse?
- A) Real-time transaction processing
 - B) Historical data analysis and reporting
 - C) Online data entry
 - D) Data encryption
185. What is the main function of a Management Information System (MIS) in an organization?
- A) Streamlining manufacturing processes
 - B) Supporting day-to-day operational activities
 - C) Managing human resources only
 - D) Providing real-time data for decision-making
186. Which component of an Organizational Support System (OSS) helps in automating routine tasks and business processes?
- A) Decision Support Systems (DSS)
 - B) Executive Support Systems (ESS)
 - C) Transaction Processing Systems (TPS)
 - D) Expert Systems
187. Which of the following is a characteristic of Executive Support Systems (ESS)?
- A) Tactical decision support
 - B) In-depth data analysis
 - C) Top-level management support
 - D) Operational transaction processing
188. In the context of data warehousing, what is ETL?
- A) Extract, Transfer, Load
 - B) Encrypt, Transfer, Load
 - C) Extract, Transform, Load
 - D) Evaluate, Transform, Load
189. What is the purpose of OLAP (Online Analytical Processing) in data warehousing?
- A) Online transaction processing
 - B) Real-time data entry
 - C) Analyzing and querying multidimensional data
 - D) Data extraction and reporting

190. What is the key advantage of using a data warehouse for reporting and analysis?
- A) Real-time data processing B) Improved data security
C) Integration of data from multiple sources D) Limited storage requirements
191. Which of the following is a non-volatile storage device?
- A) RAM B) SSD
C) Cache memory D) Magnetic tape
192. In the context of SMS alerts, what is a potential security concern?
- A) Short Message Service (SMS) encryption B) SIM card authentication
C) SMS Phishing (Smishing) D) Signal Strength
193. Which of the following is an example of a preventive control in E-Commerce security?
- A) Firewall B) Security audit
C) Intrusion Detection System (IDS) D) Incident response plan
194. What does the acronym SSL stand for in the context of E-Commerce security?
- A) Secure Sockets Layer B) Simple Service Layer
C) Server Security Language D) System Support Layer
195. Which of the following is an example of a technical control in E-Commerce security?
- A) Security policies B) Employee training
C) Intrusion Detection System (IDS) D) Incident response team
196. What is the kernel in an operating system?
- A) User interface B) Core component managing resources
C) File system D) Application software
197. Which file system is commonly used in Windows operating systems?
- A) NTFS B) ext4 C) HFS+ D) FAT32
198. Which of the following is a characteristic of UNIX operating systems?
- A) Multitasking B) Single-user
C) Limited command-line interface D) Closed source
199. What is the shell in UNIX?
- A) Protective layer B) User interface
C) Kernel module D) File system
200. What is the primary characteristic of First Generation Languages?
- A) High-level language B) Machine language
C) Assembly language D) Object-oriented language
